There are lots of 3D shapes all around us. Write the properties of each shape in the box and then find some objects that are each of the shapes.

Can you find some objects that are the shape of a **cube**?

**Properties** Faces: **6** Edges: **12** Vertices: **8**

Can you find some objects that are the shape of a **cuboid**?

**Properties** Faces: **6** Edges: **12** Vertices: **8**

Can you find some objects that are the shape of a **sphere**?

**Properties** Faces: **1** Edges: **0** Vertices: **0**

Can you find some objects that are the shape of a **cone**?

**Properties** Faces: **2** Edges: **1** Vertices: **1**

Can you find some objects that are the shape of a **cylinder**?

**Properties** Faces: **3** Edges: **2** Vertices: **0**
